

Ag Tyres & Wheels

*Australia's leading
agricultural wheel manufacturer
and tyre distribution company.*

Our Vision and History

Driven by Expertise and Engineering

At Ag Tyres & Wheels, we recognise that standard, off-the-shelf tyres and wheels rarely meet the demanding and varied requirements of modern Australian farming.

Today, with over thirty years of dedicated industry leadership, our vision remains resolute: to be the premier Australian market leader for bespoke agricultural wheel manufacturing and premium tyre supply.

We achieve this through robust partnerships with Australian agriculture machinery importers, machinery dealers, and global tyre manufacturers.

Unlike standard tyre retailers, our team comprises of dedicated specialists and engineers. We focus entirely on optimising machinery for the end user, ensuring the equipment you sell is fully fit-for-purpose from the moment it hits the paddock.

Ag Tyres & Wheels engineer fit-for-purpose packages tailored to your specific agricultural requirements.

Let's make tracks!

Precision Manufacturing in Australia

Engineered for the Agriculture Industry

Our purpose-built facility in East Bendigo is the heart of our operations.

This state-of-the-art site enables high-capacity production of specialised wheels and extensive storage of our agricultural tyre range.

Quality control is paramount. Our Bendigo facility features designated areas specifically designed for testing the compatibility of our wheel and tyre packages across all machinery makes and models.

We manufacture heavy-duty agricultural wheels in both fixed-welded and adjustable flange designs, ranging from 8" to 54" in diameter.

Every custom kit we produce is meticulously finished.

All wheels are shot-blasted, zinc powder-primed, and professionally powder-coated to seamlessly match your machinery's OEM colours, ensuring a flawless, factory-grade finish.

Integrated manufacturing, sales and dispatch facilities ensure every custom wheel kit is engineered with absolute precision and built to last.

Fully Produced in our East Bendigo Facility

Consultation & Design

We consult with machinery dealers and their customers to design custom tyre and wheel packages for specific applications.

Engineering

Our expert manufacturing team engineer wheel equipment using premium steel and advanced manufacturing techniques.

Finishing & Testing

Rigorous in-house testing guarantees every custom wheel performs flawlessly under the toughest Australian farming conditions.

Powder Coating

All wheels are shot-blasted, zinc-primed, and professionally powder-coated to seamlessly match your machinery's factory colours.

Tyre Selection

We pair our custom wheels with trusted brands like Michelin from our extensive on-site inventory for rapid assembly.

Quality Assurance

Fully assembled and meticulously inspected packages are dispatched ready-to-fit to machinery dealers anywhere in Australia.

Transform your inventory and deliver fit-for-purpose machinery by partnering with Australia's agricultural wheel and tyre specialists.

Uncompromising Strength and Reliability

When operating in some of the most demanding agricultural environments, the structural integrity of your machinery's wheels cannot be compromised. That is why Ag Tyres & Wheels integrates premium steel wheel components from Pronar into our custom builds.

Pronar is globally recognised for manufacturing quality wheel products.

Our team take these world-class components and expertly re-engineer them specifically for the Australian market.

We use these components to manufacture wheels to withstand the extreme load capacities and rugged terrains unique to Australian farming operations.

By combining Pronar's premium steel foundations with our manufacturing and finishing processes, we deliver incredibly robust wheel packages that offer longevity and safety for the end-user.

Premium Pronar steel wheel components, expertly re-engineered and reinforced for Australian farming conditions.

Fixed, Adjustable and Large Offset Wheels

Precision Engineered for Every Application

Fixed Wheels

Engineered for ultimate strength and reliability, our Fixed Wheels are constructed using Pronar, high-grade 350 steel components.

Available in 10 to 54-inch, these heavy-duty wheels are built precisely to your required track width. Every fixed wheel is dual-welded for extra strength.

Adjustable Wheels

Designed for maximum versatility, our Adjustable Wheels allow you to adapt your machinery to varied paddock requirements.

Ranging from 20 to 54-inch, we offer various designs tailored to your specific applications, capable of being manufactured to accommodate up to 20 different offset widths.

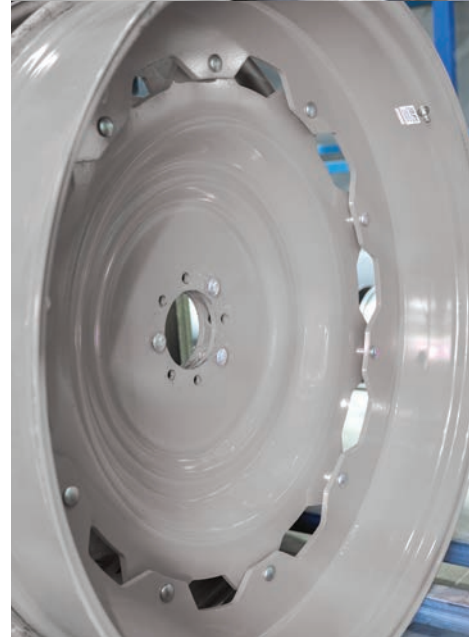

Like our fixed range, these are robustly constructed utilising Pronar, high-grade 350 steel components.

Large Offset Wheels

When adjusting track widths for non-standard row-cropping, our custom Offset Wheels provide an excellent alternative to Cotton Reel Spacers.

We can specifically engineer and manufacture these offset steel wheels to seamlessly suit your exact machinery requirements and unique field applications.

Delivering industry-leading 'know-how' and custom-engineered steel wheel packages, precision-built to match your customers machinery and maximise in field performance.

Extending Your Machinery Capabilities

Adjusting track widths is a necessity for many agricultural operations, particularly in controlled traffic farming and row-cropping.

Ag Tyres & Wheels has expanded its range of premium Cotton Reel Spacers, designed to safely and effectively modify your machine's footprint.

When modifying machinery, getting the right kit for the job is critical. Our team provides the expert advice needed to ensure the best outcomes.

Cotton Reel Spacer Features -

Custom-engineered to suit all tractor models and makes.

Available for all wheel sizes.

Manufactured in 8, 10, and 12 stud configurations.

Precision CNC-machined for a flawless, secure fit.

Finished with a highly durable powder coating.

Easy to fit and remove, our CNC-machined Cotton Reel Spacers require absolutely no permanent modifications to your machinery.

Dual Wheel Kit Features -

Custom-engineered for heavy-duty applications and challenging terrains.

Reduces soil compaction by distributing weight over a larger surface area.

Protects the structural integrity of the soil to safeguard future crop yields.

Significantly increases machinery traction and drawbar pull.

Minimises wheel slip to deliver notable savings on fuel costs.

Provides stability when operating on uneven ground or steep gradients.

Vastly improves operator safety and comfort during long shifts.

The ultimate solution for heavy-duty applications - increasing drawbar pull, maximising operator safety, and drastically reducing damaging soil compaction.

Customised for Every Enterprise

Ag Tyres & Wheels provides the correct agricultural tyre and wheel packages to guarantee ultimate performance.

We consult directly with importers and dealers to engineer packages tailored for distinct farming environments.

Broadacre Applications

Broadacre farming demands high-flotation solutions that can support massive machinery weights while protecting the soil profile.

We engineer wide-footprint packages that maximise load-bearing capacity, reduce fuel consumption through minimal rolling resistance, and allow machinery to cover vast areas efficiently.

Row-Cropping Operations

Precision is everything in row-cropping.

We design ultra-narrow, reinforced wheel and tyre setups that navigate tight crop rows without damaging plants or their root systems.

Our custom offsets ensure the machinery tracks perfectly every time.

We deliver fit-for-purpose packages - from high-flotation broadacre setups to ultra-narrow row-crop configurations.

Specialised Footprints for All Terrains

Our engineering expertise extends well beyond the broadacre paddock.

We provide specialised, custom-built packages for a variety of niche agricultural and municipal sectors.

Viticulture, Vineyards & Orchards

Operating between delicate vines and orchard rows requires specific dimensions.

We engineer narrow, highly manoeuvrable wheel packages that provide excellent traction on sloping terrain while remaining compact enough to prevent damage to valuable crops.

Turf Management & Council Grounds

For parks, sports fields and golf courses, turf protection is the primary goal.

We supply specialised low-impact, wide-flotation turf tyre and wheel packages that evenly distribute machinery weight, preventing rutting and grass damage while maintaining necessary grip.

Providing the perfect footprint for specialised environments, ensuring exceptional traction without compromising delicate turf or valuable crops.

Premium Tyre Distribution

Global Brands, Supplied Australia-wide

A cornerstone of our success is our direct relationship with the world's leading tyre manufacturers.

As a trusted national distributor, Ag Tyres & Wheels proudly supplies Michelin Agricultural Tyres, ensuring your machinery is equipped with state-of-the-art technology for superior traction, self-cleaning capabilities, and advanced soil protection.

We understand that different environments require different treads, compounds, and footprints.

We stock Michelin, CEAT and Galaxy tyres, with access to all other leading agricultural tyre brands.

Our supply chain allows us to guarantee a constant, reliable inventory of premium tyres across all market segments, from high-horsepower broadacre tractors to specialised light industrial machinery.

Proudly supplying Michelin Agricultural Tyres and a comprehensive range of premium global brands to cover every Australian farming application.

Delivery Australia-wide

National Distributor and Prompt Freight

When dealing with Ag Tyres & Wheels, all quotes include freight to your destination, anywhere in Australia.

We understand that fast dispatch is critical for machinery dealers to meet tight customer delivery timeframes.

Our packages are shipped fully assembled to your location and are 'ready to fit' immediately upon arrival.

The Ag Tyres & Wheels Advantage

Partnering with Machinery Dealers

Ag Tyres & Wheels builds strong, enduring relationships with Australian machinery businesses.

We understand that machinery dealers require more than just a supplier; you need a dependable partner who understands the pressures of seasonal deadlines and the importance of getting the job right the first time.

Through partnering with us, you gain direct access to our in-depth engineering knowledge and years of application experience.

We take the guesswork out of wheel and tyre configurations, ensuring your clients receive Original Equipment (OE) standard packages that meet precise schedules and exacting field requirements.

When you team up with Ag Tyres & Wheels, you are partnering with a prompt, efficient, and reliable service dedicated to advancing the Australian agricultural industry and making your sales process seamless.

Delivering unmatched 'know-how' to dealers, ensuring your agricultural machinery performs to your client's highest expectations.

Relationships and Key Personnel

Your Dedicated Sales and Support Team

The strength of Ag Tyres & Wheels lies in the expertise of our people.

Our dedicated team brings decades of combined personal experience to the table, ensuring that from the first consultation to final dispatch, you are supported by industry professionals who understand your business.

We provide second-to-none technical advice, prompt troubleshooting, and comprehensive after-sales service.

Partner with a team that provides technical advice, backed by comprehensive after-sales service and decades of industry experience.
